

**Title: Forester/ Business Manager (or Assistant) – Forestry, Sawmill, Nursery**

**Description:** Full time -- combined forestry service and wood products hands-on business operations and management.

**Location: Southern Colorado**

Want to be more than a specialist forester in a large organization? Truly practice “Forest First” forestry, hands on, with a large variety of what you learned in forestry school? Be an entrepreneur and enjoy rewards from your initiatives?

We have the opportunity in a small business specializing in integrated community-based full-circle forestry. This business developed from and practices Forest Stewards Guild values of ecologically, economically, and socially responsible forestry. It includes private forest management, landowner services, fire mitigation, tree planting, wood utilization, and marketing — all depending on creativity and a strong sustainable stewardship mission. Of course this goes along with strong business management, finances, personnel, operations, equipment, tech, marketing, and sales – tailored to you and a dynamic team. Training and mentoring provided.

This unusual company is in a southern Colorado low-population county with rural small town, snow-capped peaks, amazing climate, and somewhat isolated in time with old fashioned western culture. There are plenty of private recreational and working forest lands needing long-term care services, which provide steady streams of useable materials that cycle into our creative and sustainable wood manufacturing business.

The company was founded by a dedicated forester in order to live in the mountains and practice hands-on landscape-quality private forestry. It is over 40 years old and uses a business model adapted and tailored to stewardship of forests in the surrounding community. It has existing landowner clients, forest and nursery equipment, land, and a full-size sawmill / wood manufacturing facility, as well as an urban wood product sales outlet yard, showroom, and nursery. And it has successful services and products, and dedicated production employees. The owner-forester is seeking to retire and position the business to continue its growth and success.

Compensation to be based on personal qualifications and goals, work participation, and training and business results. This is an employee/ ownership full-circle private forestry business opportunity with anticipated investments of time or money.
