In America’s rural West, economic, environmental, and community health go hand in hand. Rural communities have the local knowledge needed to restore the nation’s forests, rivers, and rangelands, but they cannot do it alone. Federal programs must support communities that want to start and grow local businesses, develop capacity to act as shared stewards of the land, and implement working lands conservation. Congress must sufficiently invest in federal agencies so they can support both vibrant rural communities and healthy landscapes.

Communities play a critical role in sustaining the health of America’s land and water. To help rural America meet the rising challenges of longer fire seasons and increasing risk of drought, RVCC recommends the following funding priorities in FY2019.

**OUR TOP PRIORITIES**

1. **RURAL JOBS FOR FOREST AND RANGE STEWARDS**

RVCC supports fully funding existing grant and loan programs through USDA Rural Development that help support and grow rural stewardship economies, including the Rural Business Development Program and Renewable Energy Assistance Program. These programs help rural communities start and grow businesses that make public land stewardship possible. Federal agencies can plan projects, but local businesses are necessary to complete work on the ground.
2

**SHARED STEWARDSHIP**

Investing in partners and community-based organizations to plan and implement projects allows rural community groups to act as full partners in the restoration of America's land and waters. The [Natural Resources Conservation Service](https://www.nrcs.usda.gov) provides essential "boots on the ground" assistance to communities to help implement working lands conservation programs. On federally managed land, the [Collaborative Forest Landscape Restoration Program](https://www.fs.usda.gov/) is a critical example of a program that utilizes local collaboration to successfully implement landscape scale restoration.

3

**CROSS-BOUNDARY RESTORATION**

Restoration of natural systems is not effective if it ends at an artificial political boundary. Private working lands play an important role in restoring landscape health. Programs like the [Regional Conservation Partnership Program](https://www.regionalconservationpartnership.org), [Pacific Coastal Salmon Recovery Fund](https://www.coastalsalmonfund.org), [Conservation Stewardship Program](https://www.nrcs.usda.gov) and the [Environmental Quality Incentives Program](https://www.fsa.usda.gov) ensure that entire landscapes are being restored, from the publicly owned headwaters to the stream reaches that run through working farms, forests, and ranches.

4

**RESPONSIBLE AGENCY BUDGETS**

Federal land managers need sufficient baseline budgets to meet their obligations to the land and to rural communities. RVCC supports sufficient and stable funding for the [USDA Forest Service](https://www.fs.usda.gov), [Bureau of Land Management](https://www.blm.gov), [US Fish and Wildlife Service](https://www.fws.gov), and other federal conservation partners. The missions of these agencies do not end at day-to-day planning and project implementation; agency programs such as the [Joint Fire Science Program](https://www.jfsponline.org) also play an important role in funding practical, management-driven research to help expand our knowledge and prioritize restoration efforts.

RVCC looks forward to working with Congress and the Administration to fulfill commitments and promises to the rural communities they serve, and upon which the well-being of our nation depends.
